CIRCULAR REGARDING CLIMATE ACTION PROJECT 2020

Dear Parents,

Namaste!

We are indeed excited and delighted to share with you that the students of The Shri Ram Universal School will be participating in the Climate Action Project 2020.

This ambitious and visionary Project aims to raise awareness about Climate change and bring about a slow and decisive change among student mindsets and attitudes regarding the State of the World's Environment and to be a part of the solution for this universal problem.

As part of this program, students will be exposed to experts in the field of climate change, webinars, workshops and also virtual student exchanges.

This movement which started in 2017 with a handful of schools in Belgium has now become a world movement with more than 100,000 participants in nearly 125 countries.

The curriculum has been curated by The World-Wide Fund For Nature and has been endorsed by many national and international organisations like NASA, National Geographic, Jane Goodall Foundation etc.

We look forward to the whole-hearted participation from students to make this program a great success.

Certificates will be awarded to participants. You can find more information in the attached poster.

Let's take action together for our Mother Earth.

Regards,

R. Srinivasan,
Principal
